SCGA to Integrate Activities with the CSAA

The SCGA has agreed with the Contractor Safety Awareness Association (CSAA) to investigate and fully develop those opportunities that integrate their activities in support of their common mandate of damage prevention to underground facilities in Saskatchewan

The CSAA has, over the last 22 years, successfully brought the safety awareness message to contractors across Saskatchewan through breakfasts held in April of every year. The event has grown over the years and now brings almost 4,500 individuals representing about 1,300 companies to hear this message. This is an increase of over 300% from the first days of hosting the breakfasts. The annual public awareness event is seen as a best practice by Common Ground Organizations across Canada.

The event will continue to be led by the CSAA and its volunteers through 2014. In 2015, the SCGA and a newly created Public Awareness Task Force will lead this project. Thanks to all of the CSAA volunteers for their tremendous efforts and leadership.
